

No Monthly Fees Required!

Unlike most security and smart home hubs, Vera Controllers require no monthly fees for self-monitoring. Save thousands over time compared to cable, phone or alarm companies! Control your system from anywhere.

Self-Monitoring

Vera users save money by self-monitoring their systems, receiving instant text alerts of any security or safety events. Included with all Vera controllers for no additional charge.

Central Monitoring Service

Optional 24/7 Vera Central Monitoring Service is available throughout the U.S. Just like what the big alarm security guys do, but for a much lower price. In the event of trouble, your local Police / Fire / EMS dispatch will be called by one of our operators.

Advanced Camera Management & Storage

Vera's optional Professional Camera Management Service provides secure video archiving and camera hot zoning with specific notifications when defined areas are triggered.

A Vera Controller Unifies All Your Favorite Brands

Vera Controllers go way beyond what security hubs do, working with all the big brands including Nest, Dropcam, Insteon, First Alert, Philips Hue, Linear, Schlage, Kwikset, Yale and more. View all your cameras and control everything from one easy app. Compatibility and flexibility are what Vera is all about!

*Automate, Secure,
View & Control Your Home
from Anywhere.*
