No Monthly Fees Required!

Vera Controllers require no monthly fees, saving hundreds of dollars every year compared with your local cable, phone or alarm company. But what about security monitoring? Doesn't that require a fee? Yes, or No, depending on your needs.

Self-Monitoring

Many Vera users save money by self-monitoring their systems, using text alerts (and/or email) to be instantly notified of any trouble. This capability is included with Vera for no additional charge.

Alarm Service

Optional 24/7 Vera Monitoring Service is available throughout the U.S. Just like what the big guys do, but for a much lower price. In the event of trouble, your local Police / Fire / EMS dispatch will be called.

How Vera Saves You Money!

The EPA found that just adding a programmable thermostat can save you an average of $180 every year in energy costs*. Your Vera Controller can pay for itself in as little as one year, when paired with a smart thermostat (shown as #5 in this diagram of a typical Vera home system.)

Integrates All Your Favorite Brands

Vera Controllers work with all the big names in smart home automation, including Nest, Dropcam, Insteon, First Alert, Philips Hue, Linear, Schlage, Kwikset, Yale and over a thousand different locks, sensors, thermostats, cameras & alarms. Control all of them from one easy app, and unify them to work together. Compatibility and interoperability are what Vera is all about!

Easy, Powerful Home Automation

One Touch Control
Quickly change lights, climate and security with one tap.

Custom Scenes
Lights on when motion is detected, lock doors auto-matically, etc.

Geofencing
Automatically warm/cool the home before you arrive, lock doors, and more!

Advanced Camera Management
View all cameras together, add motion detection.

Energy Monitoring
View energy use and save money on heating, cooling and lights.

Mobile Apps
Control your entire Vera system from any iOS or Android device.

Texts & E-mail Alerts
When kids arrive home, employees leave, smoke detected, etc.

Simple Set Up
Convenient interactive installation wizards guide you at every step.

All of these devices speak Z-Wave to your Vera Smart Home Controller which connects to you via your smartphone, tablet or PC from anywhere. Anytime!

Vera Smart Home Controllers

A Vera Controller provides powerful one-app control for cameras, door locks, sensors, thermostats, alarms and other home automation and security devices (sold separately.)
